

TURNTABLE

Turntable allows the main track to intersect a secondary track section. The turntable requires no power connection of its own – the V4 lift's power-sharing feature actuates the turntable.

EXCHANGER

Exchanger functions like a branch in the road. Allows the lift access from one care area to separate care areas. The exchanger is also a power sharing device - actuated by the V4 lift.

GATE

Gate for transiting from an X-Y (movable 3rd rail) system to a single track system.

KWIKtrak

The BHM family of ceiling lifts glide smoothly under their own power, or manually along our KWIKtrak ceiling mounted tracking. KWIKtrak's low profile design blends nicely into any rooms decor. A simple straight track design provides basic point

to point transfers. The addition of a curved track allows access to the bathroom for toilet and bathing needs. Optional turntables, exchangers and gates eliminate almost all mobility barriers and allow you to use the V4 to its fullest potential.

V4™

AVAILABLE SLINGS

The lifting sling uses a loop system to securely connect it to the lifts carry bar. A variety of sling sizes and types are available to suit all needs.

HAMMOCK SLING

For most transfers. Head-rest incorporated. Suitable for most individuals. Excellent for bathing.

QUICK-FIT SLING

For general transfers. Perfectly suited for stocky or obese patients with strong hips or large thighs.

HYGIENIC SLING

Ideal for transferring to the toilet. It also permits an easy way to change, dress or undress the individual.

V4TM
CEILING TRACK LIFT

As a care provider you face numerous challenges through-out the day. Safely lifting and moving your loved one shouldn't be a strain on your back. Take care of your loved one and yourself too with help from BHM's V4 ceiling lift. The most technologically advanced lift on the market, the V4 safely and effortlessly lifts and transfers individuals from a chair to bed, bed to chair, into the bathtub or to the toilet. Powered by a high capacity rechargeable battery pack the V4 does all the work then waits in its charging station for when you need it again.

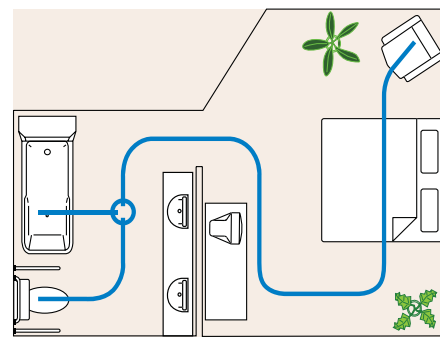

What is the best choice for you? A "J"-shaped track for easy point to point transfers? A room-covering "H" or "X-Y" track system with a movable 3rd rail? Or a personalized track system covering the entire room and adjoining bathroom?

"J" SHAPED TRACK SYSTEM

"H" OR "X-Y" TRACK SYSTEM

HAND CONTROL

At the touch of a button the simple to use hand control allows you to raise, lower and move the lift left or right. There is even an optional wireless hand control available.

Using a mechanical lift and transfer assistance device is the safest way to help you provide quality home based care.

Children through to seniors, of all body types and weights, will benefit from the gentle and secure lifting V4.
