

This stretcher is specifically designed to transfer a person in a supine position. The sling is made from nylon/polyester material that is easy to manipulate and allows for air circulation. The frame can be assembled around the person once the sling has been installed, which makes the installation faster and easier. The buckles at the headrest and footrest offer flexibility to adjust the comfort level. Fits all BHM Medical lifts however, works best with BHM Medical ceiling lifts.

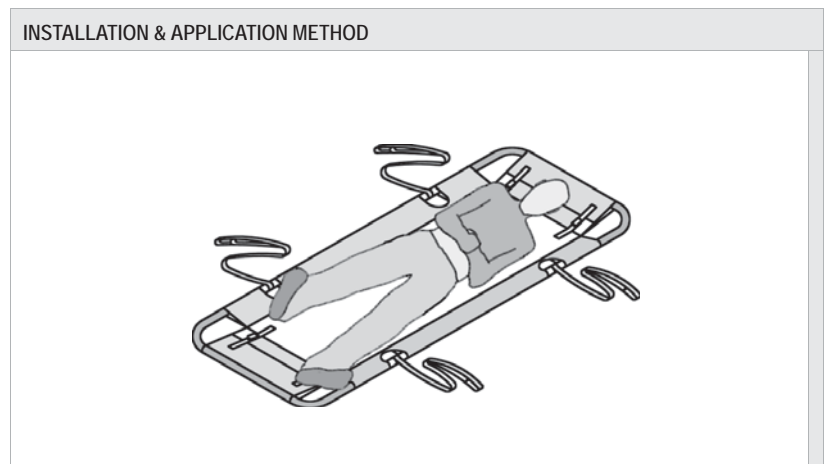

# PRODUCT	DESCRIPTION
#A3510	Universal Stretcher Sling
#A3500	Universal Stretcher Sling & Frame
