

The Chest Harness has a wide body component for increased support of the upper thorax; minimizing the harness "riding up" under the arms of the person. Designed for use with BHM Medical sit and stand floor lifts, this harness is to be used for seat to seat transfers, toileting and pericare.

The sling allows for removal of lower extremity clothe without removal of the sling.

It can also be used for practice weight bearing and balance for partially dependant people.

Persons should have good upper body control to hold themselves up and lean back.

The person's arms are positioned outside the sling at all times.

# PRODUCT	DESCRIPTION
#4001C	Chest harness non-slip - Small
#4001	Chest harness non-slip - Large

FEATURES	
Warranty against defect	1 year - washable models*
Safe working load	180 kg / 400 lb / 28.57 st
Open area from above waist to thighs	Excellent for toileting. Allows easy access to undergarments, incontinence pads, or for cleaning. Sling supports the upper body
Padded and quilted polyester	Special designed fabric is ultra-soft and long lasting. Sling provides extra comfort
Belted waist band	Belted waist band secures the person in the sling. Enables the person to stand with the security of knowing they are fully supported. Easy to install on a seated om person
Machine washable	Easy to clean and care for
Extra padding under arms	Provides additional cushion. Flexible and gentle
Mesh Back Insert	Sure-grip material keeps the sling in place. Soft material is gentle to skin
Back support strips	Distributes the weight evenly throughout the sling. Covers a wide area of the back for support. Reduces pressure under the arms

#### TECHNICAL SPECIFICATIONS

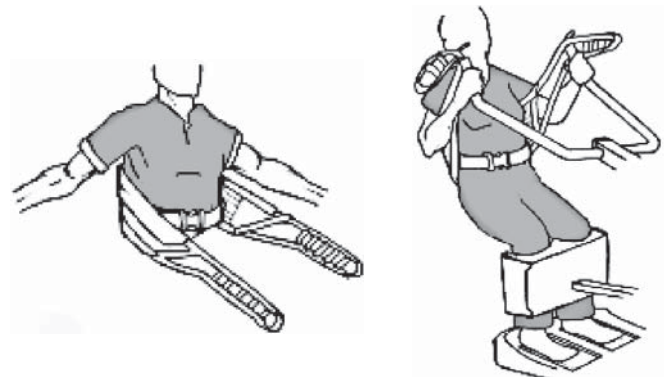

Conforms to ISO 10535 & Marked CE

\*Conditional to normal use and maintenance according to appropriate labels, the sling must be used only with the appropriate BHM Medical Inc. lifting devices.
