

ErgoStand

Ergostand

For patients with some strength, transfers will be fast and easy with the Ergostand.

Your patient is comfortably secure in our band sling with a velcro waist enclosure reinforced with 2 belts.

Our handset allows you to work beside your patient and have an extra set of controls on the control box.

Superior back support and anti-slip material ensure your patient is comfortable and safe.

The fastest and most efficient way to dress, clean and transfer patients who need additional support.

Your patient will feel comfortable and safe with the padded knee support and anti-slip foot base.

Even though the Ergostand is extra sturdy, it's still small enough to easily fit through doorways and tight spaces.

Obstacles are no longer a worry with the motorized base.

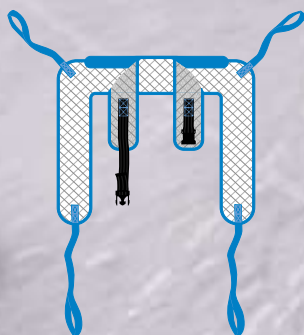

Ergostand
